S'appuyant sur la solidité du Groupe AXA, **AXA Investment Managers** (AXA IM) est l'un des leaders mondiaux de la gestion d'actifs.

Fondée en 1994, **AXA IM** est une société de gestion d'actifs dynamique, soutenue et détenue à 100 % par le Groupe AXA, un leader mondial de la protection financière. Le modèle multiexpert d'AXA IM repose sur des équipes de spécialistes de l'investissement gérant des produits intégrant une seule classe d'actifs – ainsi que sur une équipe Investment Solutions qui axe ses efforts sur les domaines suivants : Asset Liability Management, Multi-asset Investments.

Se classant 15e* des 100 principales sociétés de gestion d'actifs dans le monde (en décembre 2011) avec 512 milliards d'euros d'actifs sous gestion (AUM) (à la date du 31 décembre 2011), AXA IM propose des solutions d'investissement locales et mondiales à un large éventail de clients allant du Groupe AXA et de ses sociétés d'assurance jusqu'à des investisseurs institutionnels...

Présente dans 30 villes à travers 23 pays d'Europe, d'Amérique, d'Asie et du Moyen-Orient, AXA IM emploie plus de 2 400 salariés de 79 nationalités différentes.

AXA Rosenberg Production is a global team with 7 members spread between Singapore, Orinda and London.

AXA Rosenberg Production team mission is to maintain, monitor, qualify, enhance and support daily, weekly, and monthly investment processes (Alpha Production, Alpha Quality) and investment platforms globally and serve as the primary contact point for portfolio managers, traders and operations for issues regarding the investment process.

Implement, improve, coordinate releases, troubleshoot and administer the AXA Rosenberg investment process globally, in close collaboration with the Model and Research, Software Systems, Technology teams, and develop and support a series of Decision Support tools to enable the Investment Management Centers to act upon the recommendations produced by the investment process in a timely manner

The production team is involved in AXA Rosenberg strategic projects (e.g. new Investment strategy implementation, technical migration etc..) and is in charge of the overall Trading platform technology implementation.

Reporting to Manager Investment Process Technology, your main responsibilities will be the following:

- Troubleshoots and resolves issues as they occur in our Investment Production Systems in order to produce and deliver alphas consistently, reliably, and in a timely basis as well as facilitate the ability of our Investment teams to continuously execute trade and manage portfolios efficiently with a minimum of error and/or interruption
- Identifies and resolves, or coordinates resolution of technical issues, investigating, communicating and solving issues that occur between the trading systems and the operational and engineering systems with which they interface.
- Configures and/or implements customizations to systems that optimize the workflow for individual users, specific businesses, Models and Research and technology teams.
- Involve in Data Quality Initiative projects (Third party vendor data integration)
- Develop pragmatic methods of automating technical processes and maintains a set of automated processes that support a stable and efficient investment production platform.
- Trading Software development (Global Trading Assistant tool, EMS integration) using AXA Rosenberg programming framework and standards (including AXA Rosenberg release processes)

What sort of profile are we looking for?

Master in Computer Science or equivalent (BAC+5)

- Relational Databases (SQL and data modelling)
- Windows
- Object Oriented programming (Java, C++, C#)
- Scripting language such as Perl
- Good mastery of English is a must
- Good writing and communication skills, ability to verbally communicate technical information and explain technical problems and solutions
- Good organizational skills and a demonstrated ability of proper problem escalation
- Demonstrated ability to create pragmatic solutions to urgent technical issues.
- Interested in Finance and asset management
- Strong ethics
