----------------	--

We at YadWire are here to change public Wireless from a cost to a profit center for our customers. We grow and manage the largest possible network so as to provide our mobile terminal users with a new quality and fun surfing experience at the right time and at the right place.

If you want to challenge your knowledge and skills, be at the leading edge of delivering break through technological solutions, work with the best bred developers, and deploy SaaS applications, this position will be of interest to you.

As part of the Development Team you will work in Raanana, Israel.

Responsibilities:

- Participate in the design and development of new applications
- Maintain existing applications
- Developing quotes for new projects

Requirements:

- A first and convincing PHP-MySQL experience
- Some experience in JS (DOM manipulation)

Additional Experience:

- Knowledge of nginx (advantage)
- Hands on with Linux environment (advantage)
- Understanding of routers & network protocols (advantage)
- Experience working with frameworks like Zend or Kohana (definite advantage).

Interpersonal skills:

- High interpersonal capabilities such as organization, autonomy and initiative
- Ability to work as part of a team
- Ability to deliver on time with expected result
- High motivation for a start-up environment
- BS/ MS in Computer Sciences
- Native or perfect spoken and written English mandatory

Interested candidates are to send their resumes in English and/or in mother tong with a recent photograph to YadWire: apply@YadWire.com (.doc or .pdf requested format) with ref in email Subject: Software Developer Intern (PHP-MySQL)
