

Software Engineering Internship - Errai

Job ID: 41223

Toronto, ON

Remote: No

Application Development, Software Engineering

Company description

At Red Hat, we connect an innovative community of customers, partners, and contributors to deliver an open source stack of trusted, high-performing technologies that solve business problems. We're a billion dollar S&P 500 company offering solutions from Linux to middleware, storage to cloud, together with award-winning global customer support, consulting, and implementation services.

Job summary

The Red Hat Engineering team is looking for students to join our Toronto office. In this role, you'll join a development team working on integrating and improving Eclipse, JBoss Middleware, OpenJDK, or SystemTap. We hire creative, passionate students who are ready to work and learn within an innovative and dynamic company. We have an open and collaborative culture that's based on meritocracy - letting the best ideas win. Forget about mindless tasks or filling coffee cups. This is a fast-paced, high-energy kind of job.

Come learn why open source development is the future of IT innovation in this 16 month internship.

Primary job responsibilities

- Code in collaboration with the Red Hat Engineering team
- Test code, search for problems, and contribute solutions
- Document the progress of development
- Find bugs and triage
- Help package for distribution

Required skills

- Must be a junior pursuing a bachelor's degree in computer science or computer engineering
- Excellent English communication skills, both written and verbal
- Good knowledge of C, C++, and Java
- Ability to learn fast
- Experience working in an open source environment is a plus
