

Intern (m/f) IT Consulting - Risk & Compliance

KPMG - München

Praktikum

Would you like to gain experience towards a successful career at the interface between the business expertise and IT? We offer interested students the opportunity to gather practical experience in IT Consulting with one of the leading international accounting and consultancy firms at our headquarters in Munich. You will support our highly motivated and dynamic team and be able to put your theoretical knowledge into practice.

We offer this position in the following offices: Munich (München).

Your tasks:

- Assisting our team in advising international clients from diverse business sectors, e.g. Industry, commerce, banks, insurance companies, public sector and the energy sector
- Creation of business concepts across the redesign of organizations and information systems to the control and implementation of concepts
- Support the project team in the testing and evaluation of business processes, IT-environments and project risks
- Identify areas of improvement for our clients and help building a business case for future projects

Your profile:

- At least third semester of economics, (business) computer science, mathematics / science or industrial engineering studies
- First practical experience at the interface between business and the IT side during training and / or relevant internships
- Very good knowledge of standard MS Office applications, ideally programming skills and previous knowledge of ERP Systems such as SAP
- Excellent analytical skills, above-average motivation and perseverance and willingness
- Knowledge of the German language or willingness to learn German is required

We are looking forward to your **online application:**
