Web-based applications maintenance

Within the IT application support team at the European Investment Bank, you will be in charge of maintaining 2 Web-based financial applications for the Capital Market department. Your mission requires being able to:

- understand the application business purpose and its built-in functionality,
- identify technical issues, implement their solutions, test, build and deploy new software releases,
- meet all IT standards to release in production a new application version,
- master the various development, test and production environments

Profil

With an IT background (2 to 5 years post secondary), you are looking for a training to achieve your diploma. You are interested in discovering the banking sector, in a multicultural environment.

Your profile:

- English speaking,
- Fast learner, pragmatic, hands-on approach, sense of responsibility and ability to work with autonomy,
- Technical knowledge in PL/SQL, Java 5, JSP, JDBC, JSF, EJB, JBoss, Hibernate and Business Object Web intelligence,
